NES VulcOrings

A cost effective and fast alternative to moulded seals

- Wide-ranging, high grade material portfolio (exotic materials; FDA, 3A, metal detectable, USP Class VI, EU 1935)
- Typical joint strength of around 90% of a fully moulded part; compliance to ISO 3601-3, extending to Grade CS if required
- No loss of material characteristics across the joint
- In-house extrusion control to meet E1 or tighter tolerances
- Lowest industry compression set values (as low as 5.9%), ensuring a longer sealing life
- CSDs ranging from 1.78mm up to 40mm; no upper limit on ID
- No tooling charges
- Same day emergency service available for small quantities and high volume by agreement
